

# Identity theft protection and a whole lot more

Our benefit plans incorporate multiple layers of modern digital protection so employees can stay Cyber Safe.

## Identity Theft Protection

Our proprietary technology monitors<sup>1</sup> for fraudulent use of an employee's SSN, name, address, and birth date in applications for credit and services. The patented system sends alerts<sup>2</sup> by text, phone, email, or mobile app when a potential threat is detected.

## Online Privacy

Protect devices on vulnerable connections through bank-grade encryption to keep information private. We also scan common public people search websites for an employee's information and help them easily opt-out.<sup>3</sup>

## Device Security

Multi-layered, advanced security helps protect devices against existing and emerging malware threats, including ransomware, and helps protect private and financial information when an employee goes online.<sup>3</sup>

## Streamlined Member Dashboard

We help safeguard an employee's identity, online privacy, and devices with our easy-to-use, convenient solution.

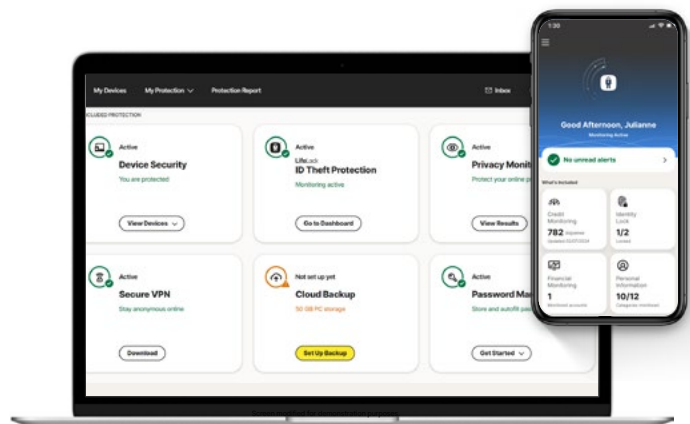

Norton LifeLock Benefit Plans offer LifeLock and Norton to help protect employees and their families.
